

KAVIYARASU R

Web Developer | 1 Year of Experience

kaviyarasurajendran0@gmail.com | +91 8056994269 | Coimbatore, Tamil Nadu

2025 – Present

PROFESSIONAL SUMMARY

Frontend-focused Web Developer with 1 year of experience building production web applications and admin dashboards using Next.js, React.js (Vite), TypeScript, and Tailwind CSS. Delivered two live spiritual platforms serving real users across Karnataka. Experienced in REST and GraphQL API integration, component architecture, and post-launch client support. Familiar with backend concepts and comfortable collaborating in full-stack teams.

EXPERIENCE

Web Developer | SML Info Tech Private Limited

2025 – Present

- Built and shipped frontend for 2 live spiritual platforms — a Karnataka-focused temple ecosystem (nammadaiva.com) and a church mass booking service platform (risennow.com) — each with a public-facing Next.js site and a separate Vite-based admin dashboard.
- Integrated RESTful and GraphQL APIs across all pages and dashboards for temple/church profiles, booking flows, donation management, event listings, and prayer request submissions.
- Managing ongoing client support for Namma Daiva — handling UI change requests, bug fixes, and iterative feature improvements based on live user feedback.
- Collaborated with the backend developer to align on API contracts, tested endpoints via Postman, and ensured robust frontend-backend data flow across both platforms.
- Currently leading all frontend development for Tinygrids (2026–present), a multi-role school management platform with School Admin, Teacher, and Parent/Student portals.

PROJECTS

Namma Daiva – Temple & Devotee Platform (nammadaiva.com)

2025 – Present

- Built the public website in Next.js and TypeScript for a Karnataka-focused spiritual platform connecting temples, shrines, and devotees — enabling pooja bookings, festival discovery, annadhana/renovation donations, and digital confirmations with zero platform fees.
- Developed a separate Vite + React admin dashboard for temple owners to manage profiles, poojas, events, donations, and festival listings independently.
- Integrated REST and GraphQL APIs for booking, donation, and event flows; actively managing post-launch bug fixes and UI updates based on client and user feedback.

Tech Stack: Next.js, React.js (Vite), TypeScript, Tailwind CSS, GraphQL, REST API

Risen Now – Church Mass Booking Service Platform (risennow.com)

2025

- Built the public-facing Next.js and TypeScript website for a church mass booking service platform enabling users to discover nearby churches, book mass services, submit prayer requests, and access faith guidance — with a companion Android app for church connectivity.
- Developed a separate Vite + React admin dashboard for church administrators to manage mass schedules, seat capacity, bookings, and community prayer tools.
- Integrated REST and GraphQL APIs for mass booking, church discovery, prayer submission, and community features; delivered a fully responsive UI across mobile and desktop.

Tech Stack: Next.js, React.js (Vite), TypeScript, Tailwind CSS, GraphQL, REST API

Tinygrids – School Management System

2026 – Present

- Leading frontend development for a school management platform with three role-based portals: School Admin (institution management), Teacher (class and attendance tools), and a shared Parent/Student login (progress tracking and communication).
- Building role-specific dashboards and protected routes in Next.js with JWT-based authentication; integrating APIs for attendance, timetable, assignments, and announcements as backend endpoints are delivered.

Tech Stack: Next.js, TypeScript, Tailwind CSS, REST API Integration

TECHNICAL SKILLS

Frontend: Next.js, React.js (Vite), TypeScript, JavaScript, Tailwind CSS, HTML5, CSS3

API Integration: GraphQL, RESTful APIs, Axios, Fetch API, Postman

Tools: Git, GitHub, VS Code

Backend (Familiar): Node.js, Express.js, MongoDB — understands architecture, collaborates with backend team

EDUCATION

B.Com – Computer Applications — VLB Janakiammal College of Arts & Science, Coimbatore

70% | 2020–2023

CERTIFICATION

MERN Stack Development — IDM Tech Park, Coimbatore (2024)
